PROFILE

Enthusiastic Front-End Developer with training in Web Development, JavaScript, and React, and currently expanding knowledge in Backend Development. Passionate about creating user-friendly web applications and continuously learning new technologies. Recognized for adaptability, teamwork, and the ability to manage multiple projects simultaneously. Highly motivated to grow professionally and contribute to collaborative environments with creativity and commitment.

EDUCATION

Backend Development Course | Coderhouse | Argentina (2025)

Node.js, Express, MongoDB, and Mongoose, applying asynchronous JavaScript, RESTful APIs, and WebSockets. Built a REST API for products and shopping carts with filtering, pagination, sorting, and full CRUD operations.

React Js Course | Coderhouse | Argentina (2025)

React fundamentals: state, hooks, component architecture, Virtual DOM, and routing with React Router. Final project: front end of an e-commerce SPA with global state management (shopping cart) and Firebase integration for product data and purchase records. Focused on developing a desktop e-commerce SPA with routing, dynamic filters, cart functionality, and Firebase integration.

JavaScript Course | Coderhouse | Argentina (2024)

Arrays, objects, higher-order functions, async programming (Promises, Fetch), JSON, Storage, DOM manipulation, events, and npm. Final project: an interactive web app solving a real-world user problem, built with a clear data structure using arrays and objects.

Web Development Course | Coderhouse | Argentina (2023)

Focused on developing dynamic, responsive web pages using HTML, CSS, and Sass. Learned Flexbox and CSS Grid for layout design, mobile-first methodology, Bootstrap framework, and basic SEO techniques. Completed a final project: a 5-page responsive website built with a mobile-first approach, applying all concepts learned throughout the course.

Electronic Engineering | Universidad Nacional del Comahue | Argentina (2015 - 2021)

Degree not completed - 65% approved. Gained programming experience through university projects involving C programming for PIC, PLC programming, and MATLAB, developing problem-solving and logical thinking skills.

Electronic Technician | EPET 14 High School | Argentina (2009 - 2014)

Early exposure to programming fundamentals (Assembler, Visual Basic, HTML, Java).

EXPERIENCE

Instrumentation Designer | CIS Ingeniería | Argentina | 2024 (March - September)

Managed technical documentation updates for instrumentation projects and worked on multiple projects simultaneously, ensuring accuracy, consistency, and attention to detail. Tasks included reviewing wiring diagrams, cable routing, among others.

Electrical and Instrumentation Designer | PLP Servicios | Argentina | 2023-2024

Managed multiple projects simultaneously, preparing and maintaining technical documentation and project deliverables while consistently meeting deadlines and ensuring high-quality, accurate results.

SKILLS

Web development: HTML, CSS, Sass, GitHub, JavaScript, React Js, Npm, Node.js, Express, MongoDB.

Soft skills: Teamwork & Collaboration, Adaptability, Continuous Learning, Time Management, Problem-Solving, Attention to Detail, Commitment & Perseverance.
